What the Data Tells Us

1. Sales are growing every year.

Revenue increased from about \$484K in 2014 to over \$733K in 2017.

2. The end of the year is the strongest period.

Profit is highest between September and December, with December delivering the best result.

3. Technology is the biggest driver of sales.

Technology generated the highest sales value, outperforming Furniture and Office Supplies.

4. The West region leads performance.

The West region produced the highest sales, followed by the East region.

5. Profit is concentrated in a few states.

California and New York contributed the highest profit.

6. A small number of products generate strong results.

The top-selling products contribute a notable share of revenue.

Key Takeaway

The business is growing steadily, with strong sales performance driven by Technology products, the West region, and key states such as California and New York.
